

Special Projects

The Old Coach House

c a m

This project involved the extensive refurbishment and restoration of the existing Grade II Listed Coach House and the adjoining stable block.

We became involved on the project directly through recommendation and we were employed by the client on a cost plus basis. We spent time with

the client going through their concept and helped to design the layout and features to provide them with the most effective living arrangement at the best possible cost.

The Coach House received a very sympathetic refurbishment which included the restoration and retention of many of the original features. The existing external walls received a damp proofing system whilst all the walls and ceilings received new finishes. The whole building was modernised to include the modern day essentials and standards expected whilst minimising the impact that these had on the original design.

The stable block was transformed from near derelict, which involved casting a new floor, installing a number of replacement timber trusses and extensive structural repairs, which has created a beautiful succession of rooms which retain all of the original character and charm. This area now provides space for the kitchen and secondary living areas.
